Subject: New Technical Manager

It is with GREAT excitement that SCCA Enterprises is announcing today that effective February 1st 2010 11 time Champion (including 7 Runoffs victories) Mike Davies is our new Technical Manager. Mike will have full control over part changes and compliance. He will also work alongside our Engine Program Manager, Shannon Snow, on new engine program projects.

I have known Mike well for a few years now and known of him for many many years. It is really exciting to have such an accomplished racer, engineer and as well as data and calibration expert join our team. I am also excited for Jerry Oleson, our Parts Manager, who has had to wait for my support when needing to discuss technical changes and sourcing for last few years. Jerry will also benefit from Mike's intimate knowledge of the SRF and FE products and tuning.

Mike will continue to work with Inspire Motorsports, a Customer Service Representative, in fully supporting their IMSA Lites customers at those events. I will have Mike focused on new projects, current part issues and the development of new compliance processes, tools and techniques. On the compliance side I look at it as having "the fox guard the hen house". Rules clean ups, and new products are also discussions and projects I will enjoy working alongside Mike.

Selfishly, I am thrilled to get the technical projects off my desk and focus on exciting new opportunities such as OEM partnerships, new cars, expanded marketing efforts and supporting our new Pro Series. SCCA Enterprises has more new opportunities available to us than ever before and we needed not just a Technical Manager, but THE BEST Technical Manager we could find. I sincerely believe that Mike Davies is that person!

Sincerely,

Erik Skirmants
President
